

Progress Report

Dear One and All:

On behalf of the administration and the students of Jinba Primary School, I would like to thank you greatly and sincerely for your efforts to help this school through the purchase of a laptop, a camera (to document Israeli Army violations) and an internet connection (to help the school to be connected with the rest of the world and to use it to have interactive lessons).

The school itself is located in an area that the Israeli Army intends to confiscate to use it for army training purposes under flimsy pretexts, displacing in the process more than 1,300 Palestinians living in the area in 12 hamlets. As such, the main goal for a number of national and international organizations working in the area is to support the steadfastness of the communities in all possible forms including supporting the three schools located in the area, the building of water cisterns, water distribution, solar panels and shelter rehabilitation among many other measures. The following map indicates the area known as Massafer Yatta (a.k.a. Fire Zone 918) and the location of Jinba within that area while the picture after it is an overview of the school itself and its barren surrounding.

Jinba School

In a meeting with the school administration, it was agreed that donations will be made to provide a laptop, a camera and an internet connection as per the following written Memorandum of Understanding

Date: Dec 9th, 2015

As such, a total of NIS 3,579 has been spent out of the donated NIS 6,736. This leaves an amount of NIS 3,157 in the hands of HIRN. I would like to take your permission to use the available funds to purchase a biology, chemistry and physics labs to the girls school in the Bedouin community of Zwedin. It is the same school HIRN has provided them with the poles to establish a fence around their school. Hope that this would be OK by you. Otherwise, we can keep the money to get other projects done for Jinba.

Once again, thank you and I am looking forward for continued cooperation.
